

Human Rights

The United States and China both recognize the positive role of the Universal Declaration on Human Rights and other international human rights instruments in promoting human rights. They reiterate their commitment to the promotion and protection of human rights and fundamental freedoms.

While the two countries have not resolved their differences on human rights, they have agreed to discuss them through dialogue at both governmental and non-governmental levels in the spirit of equality and mutual respect. The two countries agree to hold discussions on the structure and functions of an NGO forum on human rights.

Cooperation in the Field of Law

The United States and China agree that promoting cooperation in the field of law serves the interests and needs of both countries. They will strengthen cooperation in combating international organized crime, narcotics trafficking, alien smuggling, counterfeiting and money laundering. To this end, they intend to establish a joint liaison group for law enforcement cooperation composed of representatives of the relevant agencies of both governments. They agree to begin consultations on mutual legal assistance aimed at concluding a mutual legal assistance agreement.

The United States and China will assign counternarcotics officers to their respective embassies on a reciprocal basis. Recognizing the importance the United States and China each attaches to legal exchanges, they intend to establish a joint liaison group to pursue cooperative activities in this area. These may include exchanges of legal experts; training of judges and lawyers; strengthening legal information systems and the exchange of legal materials; sharing ideas about legal assistance; consulting on administrative procedures; and strengthening commercial law and arbitration.

As part of this program of legal cooperation, China's Minister of Justice will visit the United States in November 1997 at the invitation of the U.S. Attorney General.

Military-to-Military Relations

The United States and China have reached agreement on the establishment of a consultation mechanism to strengthen military maritime safety, which will enable their maritime and air forces to avoid accidents, misunderstandings or miscalculations.

They agree to share information and discuss issues related to their respective experiences in the areas of humanitarian assistance and disaster relief.

Science and Technology, Educational and Cultural Exchanges

The U.S.-China Joint Commission on Science and Technology will continue to guide the active bilateral scientific and technological cooperation program, which involves more than 30 agreements reached since 1979, and will promote the further use of science and technology to solve national and global problems. The United States and China also will identify areas for cooperative projects using space for Earth science research and practical applications.

The United States and China will expand educational and cultural exchanges. Both Presidents believe that increased people-to-people exchanges will help cultivate long-term bilateral relations.

President Jiang Zemin expressed his thanks to President Clinton and the American people for their warm reception and invited President Clinton to visit China in 1998. President Clinton accepted this invitation with pleasure.

NOTE: The joint statement was made available by the Office of the Press Secretary but was not issued as a White House press release.

Statement on the Death of John N. Sturdivant

October 29, 1997

Hillary and I were deeply saddened today to learn of the death of American Federation of Government Employees National President John N. Sturdivant.

For more than 30 years, John played a vital role in the success of the American trade union movement. A born organizer, his determination, leadership, and commitment

were central ingredients to the growth of AFGE, the largest Government employee union.

A champion of labor-management partnerships, he played an important and highly visible role in our initiative to reinvent Government. He was a true hero of the reinvention process, and his efforts contributed in a great measure to a Government that really works for all citizens.

I saw his commitment to Federal employees first-hand when we worked together during the Oklahoma City tragedy. He was a man who considered every Government worker—AFGE member or not—his sister or brother. His vision and creative leadership in improving the safety and security for all Federal employees at work will be just one of his legacies.

But another legacy will be his tenacity and strength—which he clearly demonstrated during the Government shutdowns in 1995. These events were truly defining moments for John and his union. His leadership was an inspiration to all of us, and I was very proud to stand shoulder-to-shoulder with him in this fight.

Today our thoughts will be with his daughter, Michelle, his family, and the men and women he served with such distinction.

**Executive Order 13066—
Amendment to Executive Order
13037, Commission To Study Capital
Budgeting**

October 29, 1997

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to increase the membership of the Commission to Study Capital Budgeting, it is hereby ordered that the second sentence of section 1 of Executive Order 13037 is amended by deleting “11” and inserting “no more than 20” in lieu thereof. It is further ordered that section 3 of Executive Order 13037 is amended by deleting the words “by March 15, 1998, or”.

William J. Clinton

The White House,
October 29, 1997.

NOTE: This Executive order was published in the *Federal Register* on October 31.

**Message to the Congress
Transmitting a Report on
Aeronautics and Space Activities**

October 29, 1997

To the Congress of the United States:

I am pleased to transmit this report on the Nation's achievements in aeronautics and space during fiscal year (FY) 1996, as required under section 206 of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2476). Aeronautics and space activities in FY 1996 involved 14 contributing departments and agencies of the Federal Government.

A wide variety of aeronautics and space developments took place during FY 1996. The Administration issued an integrated National Space Policy, consolidating a number of previous policy directives into a singular, coherent vision of the future for the civil, commercial, and national security space sectors. The Administration also issued a formal policy on the future management and use of the U.S. Global Positioning System.

During FY 1996, the National Aeronautics and Space Administration (NASA) successfully completed eight Space Shuttle flights. NASA also launched 7 expendable launch vehicles, while the Department of Defense launched 9 and the commercial sector launched 13. In the reusable launch vehicle program, Vice President Gore announced NASA's selection of a private sector partner to design, fabricate, and flight test the X-33 vehicle.

Scientists made some dramatic new discoveries in various space-related fields such as space science, Earth science and remote sensing, and life and microgravity science. Most notably, NASA researchers cooperating with the National Science Foundation found possible evidence of ancient microbial life in a meteorite believed to be from Mars.

In aeronautics, activities included the development of technologies to improve performance, increase safety, reduce engine
